

## **CONCERNED ABOUT YOUR MEMORY?**

**LEE MEMORY CARE** offers **FREE MEMORY SCREENINGS** at both Lee Memorial and Cape Coral Hospitals. This is a 15-minute test which evaluates a person's orientation, concentration and memory. A neurological diagnosis cannot be made based on the results of this test; it is simply a tool which can demonstrate that further testing may or may not be indicated. The results are reviewed by one of the neuropsychologists at Lee Memory Care, who will send the participant a confidential letter with any recommendations he or she may have. However, there is never any obligation on the part of the participant to act on these suggestions, and any follow-up testing would be strictly voluntary.

Memories are too precious to lose. The earlier you get a diagnosis, the earlier you can take control. Doing nothing can be the worst thing to do!

For more information, or to make an appointment to schedule your free memory screening at either location, please call Lee Memory Care at 239-334-5634.
