SUBJECT: INSULIN ORDER SETS GO LIVE OCTOBER 5, 2010

Dear Colleagues,

Lee Memorial Health System will be consolidating four of the existing Sliding Scale Insulin Order Sets into one Sliding Scale Insulin Order Set October 5, 2010. Physicians will be required to order one of the three available Sliding Scale Protocols on this order set: Highly Sensitive, Normal Sensitive, or Insulin Resistant.

The Adult Sliding Scale Order Set will be replacing the following:

1. Diabetes / Sliding Scale Insulin Orders PO/NPO (# 3136A/B)
2. Steroidal Medical Insulin Orders (# 3341)
3. ICU Glycemic Management Orders (# 3471)

The following order sets will remain available for use:

1. Adult Basal/ Bolus Subcutaneous Insulin Orders (# 3728)
2. Glucommander/IV Insulin Orders (# 3306)

Please note that when implementing the Adult Sliding Scale Insulin Orders, all previous diabetes medications, including insulin will be automatically discontinued by pharmacy. You may add new orders based on patients individualized needs. You may also choose not to implement an order set and write your own orders.

Please do not hesitate to contact Lee Diabetes Care (573-5720) for a fax of the new order set or with any questions or concerns.
